

CASE STUDY

Boasting extensive recognition for achieving new heights in sustainable building design, the Surry Hills Community Centre showcases the versatility of the DecorFire panelling system. Decor Systems, DecorFire, sets the benchmark for sleek and stylish interior panelling which is impressive in both its appearance and environmental rating. DecorFire's FSC Chain of Custody certification enables compliance with fire and green codes which are necessary for safe and sustainable community buildings. DecorFire's flexibility was also featured by the ability to colour match the stained of the Surry Hill Community Centre's exterior cladding panels. A perfect match inside and out!
