How to use your DecorFinishes Selector Guide.

Use your DecorFinishes Selector to specify the exact finish or finishes for your project.

Use it in 2 simple ways:

1. First, select your Decor base panel that meets your design and/or acoustic requirements - we have panels specific to every possible project. Now you have chosen the Decor panel, use this easy Selector Guide to nominate which finish you'd like Decor Systems to apply to your panel/s.
2. The other way to choose is to use the DecorFinishes Selector Guide to select a finish you'd like to use - then simply refer to the Reference Grid above to see which DecorPanels your chosen finish is compatible with.

Naturally, our Technical Consultants are always available to advise and help. Just ask. We also provide personalised specification assistance tailored to your specific project's precise requirements.
